- Developed an end-to-end Cloud-based website providing real-time taking attendance, and managing the details of students and teachers.
- Worked closely with the design using Angular Framework.
- Technologies used: Angular, Node.js, Express, MongoDB
- Github Link: https://github.com/Srishti-MSB/AttendenceSystem.github.io

CERTICATES

Web Design for everybody

📅 May 2023   📍 Cousera

- The five-month program provided a comprehensive learning experience focused on HTML, CSS, and JavaScript. I had the opportunity to acquire essential skills in web development during the course. Upon successfully finishing the program, I likely received a certificate of completion.
